

Timber Kit Bridges

CTS timber kit bridges offer great value for money. They are designed to use readily available timber sizes to keep costs to a minimum.

They are supplied in component kit form making them ideal for areas where access is difficult.

Available in Hardwood or Softwood and with FSC certification
All softwood is pre-treated for a 30 year service life and Hardwood is naturally durable with a service life of 40 years.

All our kit bridges are delivered with a parts list, assembly drawing and assembly instructions. All components are pre-drilled for quick and easy assembly on site. All fittings are provided.

CTS kit bridges are all designed for 5kN/m² (crowd loading) and provide an economical yet safe bridge solution for the smaller length bridge.

Delivery is available to all areas of UK.

If you do not wish to assemble the kit yourselves, CTS can provide an assembly service for the bridge onto abutments prepared by others.

Standard lengths are 2.7m, 3.3m, 3.9m, 4.5m, 5.1m, 5.7m, 6.3m 6.9m, 7.5m, 8.1m, 9.0m, 9.5m, 10m, 10.5m.

The standard kit bridge widths are 450mm, 825mm, 1.2m, 1.5m, 2.0m but we can manufacture to any size required and adapt them to the requirements for cycle or bridleways.
